

# EPIC MODEL PROTOTYPE

## THE QUESTION

How do you define your contributions as a code/web dev?

## CORE ENERGY AREAS

What areas must you focus energy to achieve your value outcomes?

## CORE RESOURCES

What resources are required to achieve your value outcomes?

## VALUE OUTCOMES

What value do you add to the code/web dev ecosystem?

How do you define tangibles; intangibles stemming from your place in the code/web dev ecosystem that are of value to you?

## THE NEXT QUESTION

How do you implement your place in the code/web dev ecosystem?

## PRESENCE FACTOR

What channels do you use to inform your place and contributions in the code/web dev ecosystem?

## INCOME AREAS

What areas can you reasonable earn income, and how do you ensure you earn your worth?

## CORE SACRIFICES

What must you (and individuals you care about) sacrifice to achieve your value outcomes?

## MORE CORE SACRIFICES

What must you (and individuals you care about) sacrifice to achieve your value outcomes? What are reasonable sacrifices for those who pay you for your place and/or contributions? How do you leverage your areas of improvement versus extras you can comfortably add in your contributions?
